Education

North Maharashtra University

Jun. 2024 – Jun. 2025

Master of Business Administration (MBA) in Information Technology

MET Institute of Engineering

Jun. 2020 – Jun. 2024

Bachelor of Engineering (B.E.) in Computer Engineering

Experience

Parity Fox

May 2026 – Present

Junior Intern

Pune, Maharashtra

- Developed an AI-powered School Chatbot using Retrieval-Augmented Generation (RAG), LangChain, Pinecone, and Hugging Face LLMs.
- Built a Streamlit interface and integrated a FlutterFlow frontend with a FastAPI backend for web and mobile accessibility.
- Improved chatbot performance through RAGAS evaluation and retrieval optimization, enhancing response quality and contextual relevance.

Pratastren Infotech Services

Jan. 2026 – Apr. 2026

Software Developer

Mumbai, Maharashtra

- Developed an enterprise Work Management System using Angular, Node.js, Express.js, and MongoDB.
- Built Dashboard, Timesheet, Leave, Expense, Employee, and Task Management modules.
- Improved workflow automation, reporting capabilities, and overall user experience through scalable application development.

Projects

WorkMate | *Angular, Node.js, Express.js, MongoDB*

- Developed an enterprise work management system with role-based access control.
- Built Timesheet, Leave, Expense, Task, Project, and Dashboard modules for efficient workforce management.

AI-Powered School Chatbot | *RAG, LangChain, Pinecone, Hugging Face, Streamlit, FlutterFlow, FastAPI*

- Developed an AI-powered Retrieval-Augmented Generation (RAG) chatbot for answering queries from school documents.
- Built an efficient document retrieval pipeline to generate accurate and context-aware responses.
- Enhanced chatbot accuracy through retrieval optimization and performance evaluation using RAGAS metrics.

AI-Powered Email Classification | *n8n, AI Automation*

- Developed an automated email classification workflow using n8n and AI models.
- Designed workflows to categorize incoming emails based on their content and intent.
- Automated email routing to reduce manual processing and improve workflow efficiency.

Technical Skills

Languages: Python, JavaScript, SQL

Frontend: React, Angular, Streamlit, FlutterFlow

Backend: Node.js, Express.js, FastAPI

Database: MongoDB, Pinecone

AI/ML: Retrieval-Augmented Generation (RAG), LangChain, Hugging Face, OpenRouter, RAGAS, Large Language Models (LLMs), n8n
